Ref.No.: 079/PJ/OVZ/2025   In Olomouc on 05.06.2025

Subject: Explanation of the procurement documentation No. 1

In accordance with Sections 98(3) and 99(1) of Act No. 134/2016 Coll., Public Procurement Act, as amended (hereinafter referred to as "the Act"), we hereby provide you with the following explanation to the procurement documentation in respect of the public supply contract awarded in the above-threshold regime in open procedure in accordance with provisions of Section 56 of the Act entitled: **" Faculty of Science/UPOL - Computational server and data storage for 3D structure analysis from cryo electron microscope data"** published in the national Tenders Electronic Daily under Reg. No. of the public procurement: **Z2025-028569**.

Question No. 1:

The contracting authority requires: "installed software for 3D analysis of cryo electron microscopy data (single particle analysis): CryoEM Stack (Relion 4 + 5, IMOD, MotionCorr, GcTF), CryoSparc 4."
Is this requirement to be understood in the sense that the contracting authority holds valid licenses for the above-mentioned software, which will be provided to the contractor/supplier for the performance of the subject of the contract (their installation on the GPU server)?

Answer:
The above-mentioned 3D analysis software is freely available. We require its installation in order to ensure full compatibility of the software with the computing server hardware.

Kind regards,

Mgr. Petra Jungová, LL.M.
